PRICE LIST**SHIPPING SEASONS—**

April, May, and early June are most advantageous spring shipping months. Fall season begins in late August and continues until late November.

SHIPPING METHODS—

Express is most advantageous when it is not possible to call by car or truck at the nursery. Freight in less-than-carload quantities is generally not recommended due to the additional time required for delivery. Unless you specify how shipment is to be made we will use our best judgment. Transportation charges are collect.

PACKING—

Plants are carefully packed to withstand 10 days or more in shipment without injury. Charge for boxing or baling is made at cost and averages approximately 15 percent of plant cost.

La Bars'

15-18" hgt.	5.00	2 1/2-3' hgt.	9.00
18-24" hgt.	6.00	3-3 1/2' hgt.	12.00

Rhododendrons for Naturalizing . . .

For the developing of mass effects in wooded natural areas, it is in many instances preferred that the plants be irregular in shape and of a lighter and less rounded outline than those generally called for. In quantities of 25 or more plants we can furnish this quality Naturalizing Rhododendron at a discount from prices in this list. The stock is fully nursery-grown, healthy and vigorous, and is ideal for creating natural groupings. Rhododendron maximum is the preferred variety and is available in quantity, although a smaller number of the other varieties could be included if desired. Prices will be quoted on request.
